

Perspective Institute (All Day 8 Hour Seminars):

100 + Science Principles in the Bible:

This presentation aims to reveal over 100 evidentiary examples of modern science that were written about thousands of years ago that could only have been placed there by divine hand. The aim of this seminar is to bolster a basic belief in the inspiration of the ancient scriptures.

How to identify and refute Cults:

This specific seminar is designed to provide the attendee with a greater understanding of the claims of Mormonism and how to identify the pitfalls of logic and the sheer deception that comprise the claims of this church. Christians without a deep walk or clear understanding have often been seduced into this doctrine and turned away from basic Christianity while under a cloud of spiritual misdirection.

The Science of Origins (Evolution vs Creation):

Evolution creates a world view that conveniently ignores the Genesis model. Here, the claims of the Theory of Evolution are examined from a science perspective that is not often told in schools or University settings. As time elapses and science knowledge advances, many of the assumptions upon which the Evolutionary model was built are disintegrating while the Creation model continues to find more scientific support. Our purpose is to equip the learner with the knowledge that gives logical and intellectual validation to the Creation model.

Operation Tent Peg (90 Minute Seminars):

Just as a tent peg is designed to hold a tent firmly to the ground in strong winds, Operation Tent Peg is designed to provide many unknown facts that will hold a Christian to the idea of the inspiration of the Bible in an age of powerful misdirection. This is designed for shorter time segments, and also with youth in mind.

Biblical Numerics:

Stunning numeric patterns have been discovered in both the Old and New Testament that can only be explained by inspiration. This type of inspiration is of a nature that every word, every sentence, and every page has to come from God alone with no wiggle room for the corruption from man.

Biblical Codes:

A coded message system has been uncovered in the last 20 years that could only have appeared in the age of high speed computers, placed there from beyond eternity. This again validates the inspiration of scripture in a generation of doubt and unbelief.

Modern Science Principles found in the Ancient Bible:

While many hold the idea that modern science has disproven the Bible, the over 100 science principles written by aged men in ancient manuscripts stand in stark contrast to this idea. How does one write about 100 + science concepts that won't be discovered for thousands of years?

Fossils and the Geologic Column:

An examination of the fossil record and claims of the geologic column upon which scientist rest confident in the theory of evolution and the long time tables required to achieve it. Closer examination reveals some gaps in the logic required to hold this together.

The Issue of Time:

The entire Theory of Evolution rests upon the idea that there are millions of years for evolution to unfold. However, most clocks in nature point in the direction of things being younger, not older. Rather than cause a rethinking, this mostly inspired a doubling down on a theory that is becoming unwieldy.

Dinosaurs & the Bible:

The idea has been planted deep in the heads of modern society that dinosaurs lived millions of years ago and died out before the arrival of man. New evidence says otherwise.

The Chain Theory:

Just as each metal link in a chain is critical for an anchor to hold a boat in place, the Theory of Evolution has critical 'event links' that are mandatory in holding the evolutionary theory in place. One broken link and everything comes apart. This seminar examines these links.

Light Speed:

Most of our present understanding of the universe is based on the presupposition that light speed is constant. Recently this has been discovered not to be as reliable as once thought since it has been slowed down in a lab to 38mph, and sped up to 300X its' normal velocity. This undoes everything.

The 12 Principles of Truth:

While the truth about many things seems to change as more discoveries undo what we previously thought, there are 12 principles about the nature of truth that never change. These are critical and solid in a world in which the truth seems to change daily.

Perspective Institute

Perspective Institute is dedicated to strengthening your foundation in Biblical Beliefs and fostering absolute trust in the Holy Scriptures. We offer a range of Educational Seminars covering topics such as science, history, prophecies, cults, and the enigmatic codes and mathematical patterns found from Genesis to Revelations.
